

Daily Immune System Support

Inside your body is an amazing protection mechanism called the immune system. Your immune system is composed of a complex network of organs and cells. It serves as the foundation of your overall health and wellness, working around the clock in thousands of ways to support the healthy functions of your body. 4Life Transfer Factor Classic is a supplement on the forefront of nutritional science and arguably the most advanced immune system support available today. It is formulated with a powerful extract of transfer factors—tiny molecules that are able to transfer immunity information from one entity to another, such as between a mother and her infant who she breastfeeds. 4Life Transfer Factor Classic contains our original Transfer Factor XF[™] ingredient for excellent daily immune support.

Key Points

- **Transfer Factors:** Transfer factors are tiny molecules that transmit immunity information from one entity to another, such as between a mother and her infant who she breastfeeds. These “smart molecules” support healthy immune responses, including the body’s ability to remember past health threats. 4Life made its mark on the health supplement industry with our original TransferFactor XF, a proprietary ingredient sourced exclusively from cow colostrum. Their power is then concentrated to provide a unique and innovative supplement to support your body’s immune system.
- **Scientifically Studied:** In an independent study, 4Life Transfer Factor Classic increased the Natural Killer (NK) cell activity 204 percent above normal immune response.¹
- **Shared Immune Knowledge:** Transfer factor molecules can be shared safely and effectively. Whether they are transferred from cow to human or from chicken to human, transfer factors are not species-specific. The two most abundant and safest sources of transfer factors come from cow colostrum and egg yolks.
- **Systemic and Active Nature:** Transfer factors promote healthy cellular immune functions, including enhancing natural antibody production through the entire body.

Technical Points

- Natural Killer cells, or NK cells, are important immune cells that seek and destroy harmful cells through direct contact. When invaders enter your body, these NK cells are on the front lines of your immune defense.

1. Test results obtained from a blinded study conducted by Dr. Anatoli Vorobiev at the Russian Academy of Medical Science.

CLASSIC

DIRECTIONS: Take three (3) capsules daily with 8 oz of fluid.

Supplement Facts

Serving Size: Three (3) Capsules
Servings Per Container: 30

| Amount Per Serving | %DV* |
|--|----------|
| Transfer Factor XF [™] | 600 mg † |
| A patented concentrate of transfer factors and other natural components from cow colostrum | |

* Daily Value

† Daily Value not established

Other Ingredients: Gelatin capsule and maltodextrin.

CONTAINS INGREDIENTS FROM MILK.
